

THE LONG HAUL FROM DOWN UNDER

12,000 MILES, OVER SAND AND SEA, AUSTRALIA SENDS AMERICA FINE BLUE ASBESTOS . . . SPEEDING VICTORY

Deep in the rain-starved heart of Australia, next door to the original gold-rush towns which opened that western country to prospectors and prosperity, lies another deep-buried treasure — vast deposits of high-grade asbestos. Blue Asbestos, more valuable to us than gold in our production of war materials. Trusty camels trek the precious mineral from the almost inaccessible plateaus, two hundred miles over shifting hot sands, to the sea. Storm-tested boats and stout-hearted men brave the worst dangers of war and weather, to bring it safely over thousands of miles of ocean . . . for the machines and weapons America needs, for Victory.

For twenty-five years, we have been bringing the finest types of raw asbestos from all over the world, and processing them in our works at Millington, New Jersey, for the various uses to which they are best suited. We are the only company in America which has specialized in this. Perhaps out of our unique and extensive experience, we may be able to suggest ways in which you can use asbestos to the best advantage in your war manufacturing. Inquiries will receive prompt attention.
