

billions of Btu's every day are conserved by ASBESTOS

Because asbestos has the right combination of properties for exacting high temperature insulation duties in oil refineries, power stations and other plant. It keeps heat in its place. Provides vital fire protection in buildings and ships. Heat shields in space craft. Stopping power and staying power for brake linings. Without asbestos, industry would be far less efficient . . . and life for everyone far more hazardous.

Asbestos · the indispensable industrial material
