

NEW! NEW! NEW!

Johns-Manville TERRAFLEX

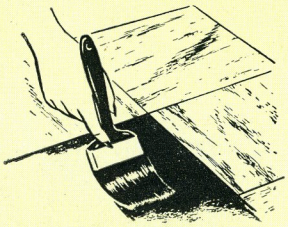

STANDARD GAUGE 1/16" THICK

VINYL ASBESTOS FLOOR TILE

a resilient flooring
of outstanding beauty and durability—
pioneered and developed by
Johns-Manville for your home

HERE'S A FLOOR THAT ANYONE CAN INSTALL AND SAVE MONEY.

New standard gauge TERRAFLEX® offers you many unique values and advantages:

1. Terraflex can be cut and fitted with scissors.
2. Easier to install with new Terraflex Adhesive that brushes on like paint — requires no troweling.
3. It's so flexible the normal movement of the wood underfloors will not crack it.
4. Terraflex defies ordinary oils and greases. Strong soaps and cleaners will not mar its beauty or affect its durability.
5. Comes in a choice of beautiful colors providing unlimited opportunities for the floor design to fit your color scheme.

Cork and Spatter Type

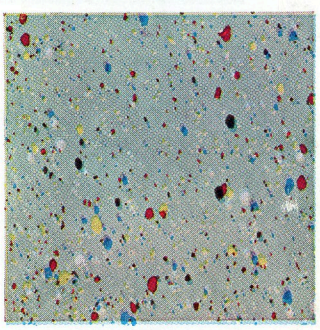

Now, Johns-Manville vinyl asbestos Terraflex Tile is available in seven new spatter type and three new cork type colors. These beautiful new colors are in addition to the seventeen Terraflex marbleized colors shown on preceding page. Made in 1/16" thickness, spatter and cork type tiles have been specially designed as a floor or wall surfacing for residential use. These new tiles have all the superior physical properties and color styling that have made Johns-Manville Terraflex the outstanding vinyl asbestos tile on the market today.

FORGET SCRUBBING! a damp mopping keeps TERRAFLEX VINYL ASBESTOS TILE shining bright

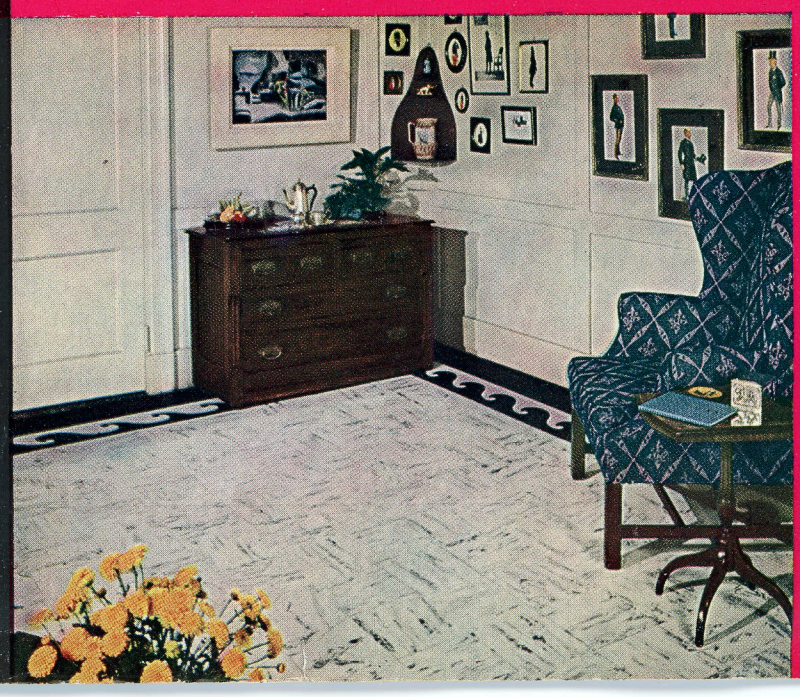

Terraflex is so dense in composition it's practically impermeable to dirt. A damp mopping usually is sufficient to keep it spic and span, clean, bright and sanitary. This makes it outstanding as a kitchen floor. Waxing is not necessary, although an occasional waxing gives added luster to the surface and the colors.

Keeps its first day beauty a lifetime

Terraflex vinyl asbestos tile will greatly outwear other types of resilient flooring of equal thickness. The bright, clear colors go all the way through each tile and retain their fresh cheerfulness for the long life of the floor. Use Terraflex all through the home. It can be installed on any interior floor, wood or concrete, that is smooth, firm and clean.

Use this color chart of TERRAFLEX vinyl tile to design your own floor patterns
