Re: Civil No. 6329 - Samuel R. Potter
vs. Fibreboard Corporation, et al.

Dear Mr. Stephenson:

I am enclosing the following literature covering Fibreboard Corporation's insulation products:

1. Pabco Heat Insulation Manual. F-1

2. Pabco Super Caltemp - Physical Characteristics of Pipe and Block Insulation. F-2

Pabco Super Caltemp, for dependable temperature control to 1500F. F-2(a)

3. Pabco Super Caltemp - Molded Elbows. F-3

4. Pabco No. 127 Cement. F-4

This represents all current literature on Fibreboard's products. Copies of older literature are not available. You may have some left over from the Templait case, and, of course, these could be applicable.

I am sending under separate cover the following samples:

1. No. 127 Cement. Hydrous Calcium Silicate Mineral Binders, less than 5% asbestos. 1966 to date. F-5

asbestosclaims.law/library/10287/1

2. Super Caltemp Cement (this is actually made from waste Super Caltemp Block and Pipe Covering, although it is called simply "Caltemp." Hydrous Calcium Silicate, less than 15% asbestos. 1968 to date. F-6

3. Super Caltemp Pipe Covering. Hydrous Calcium Silicate. 1968 to date. F-7

4. Super Caltemp Block. 1968 to date. F-8

We have no samples of Prasco, Magnesia or our regular Caltemp, since production of these products was discontinued some time ago.

Very truly yours,

Geo. A. Weller
