J. P. Woodard

Dr. Stevenson - Asbestos
Retirement
Yours June 26th

I believe that due to the number of Asbestosis cases that will come up for consideration in the next few years it would be most helpful if we could work out some sort of an arrangement whereby Dr. Stevenson after retirement could be used on a consulting basis. It seems to me that we could use him in this capacity in about the same way we use Dr. Smart in Los Angeles.
