STONEFELT INSULATION
Douglas Aircraft Corp.
Santa Monica, Calif.

We are in receipt of a report from one of our representatives, Mr. D. E. Blanchard, regarding a call that he made on Mr. Winkler an Engineer of the Douglas Aircraft Company at Santa Monica, Calif., reading in part as follows:-

> "He also stated that laborers handling this Stonefelt and also Fiberglass were complaining of itching and wanted higher wages for doing this work. Mr. Winkler stated that he wants all information telling that Stonefelt will not cause infection and poisoning, and is in no way harmful to handle. He wants this information in a form that can be presented to the employees handling Stonefelt."

Inasmuch as in the past you have advised us how somewhat similar requests should be answered, we would appreciate your furnishing us in this case also a draft of the letter we should send to Mr. Hennessy, our Division Manager at Santa Monica, in regard to further handling of this.
