We are sending to you today, via registered mail, X-rays of Steve Cedotal, who currently is a machine tender on the Green Roll in the Shingle Department. I would like for you to review these X-rays and make a determination based on the medical evidence, whether this man should be removed from this job.

This is the employee who Dr. Logan frightened by informing the employee that he should get off the job immediately. Since that time, we have told both Dr. Gidman and Dr. Logan, that any further information of this type regarding any employee should be told to us and that the Company will make the determination as to what will be done with the employee in question.

Please review X-rays and give me your opinion.

C. L. Hite - Marrero
