G. H. Gould
Manville Plant

RE:

We have reviewed the [redacted] information in connection with subject case.

Dr. K. B. Smith has read the x-ray films and his impression is "early asbestosis".

The 18 x-ray films have been returned to you under separate cover. Please check Dr. Smith's comments regarding the x-ray films in his letter to Mr. Harrill with copy to A. Demarco, dated 5/7/64.

This case is not in litigation to date. Ordinarily, I would suggest calling the employee into the office and advising her that we will assume responsibility for treatment of her pulmonary condition. We would also pay temporary workmen's Compensation benefits for any future absence due to this illness. Payment of permanent partial disability would not be paid unless she was no longer capable of working.

I suggest delaying the foregoing usual case handling procedure pending our meeting with Mr. Fritz on May 21-22. Although no claim has been filed, we should consider such handling procedure for this type of situation in view of current circumstances. It's predicted that the one week delay of this matter will not have a major effect on whether or not it is filed.

Please hold this case folder for a meeting with Mr. Fritz on May 21-22.

The work history indicates that employment was chiefly in the Insulation and Friction Materials Plant except for a very brief time in the Industrial Insulation Plant. The case costs should be charged accordingly.

C. L. Sheckler
