Mr. D. C. Renton,
Chief Plant Engineer,
Manville, N. J.

DUST EXHAUST SYSTEM
File M - 6 - G,
Mr. Bates' letter June 21st.

You have received a copy of Mr. Bates' letter to me of June 21st regarding the above. I should like to have an opportunity of looking over this layout with you before it is finally approved, because the expenditure runs into a total of $5,561.00, and I understand this will clean up all of our dust conditions at the Pittsburg location.

S. A. WILLIAMS,

Vice President

cc. Mr. C. L. Bates,
Manager,
Pittsburg, Cal. Factory.

This is an AIR MAIL LETTER

Pittsburg Factory

Mr. S. A. Williams
Vice President

DUST EXHAUST SYSTEM
File M - 6 - G

We are filing today with Mr. Renton for his approval revised prices on the proposed dust collecting system for our pipe covering and cement departments.

This layout at $2861.00 is the cheaper of the several propositions and is equally efficient. This also includes transferring the Federal Dust Collector from Lompoc to Pittsburg. This equipment has been abandoned by Lompoc but is in good condition and can be transferred for the cost of freight, loading and minor repairs. We are effecting a saving of about $550 by utilizing the Federal Collector.

It will cost $1200 to provide a dust collecting equipment for our rigid shingle department(making machine). A system for our roofing department (#1 roofing machine at section where surfacing materials are applied) will cost $1500.00 making a total of $5561 which it will be necessary to expend to take care of our dust conditions. Upon receipt of your approval, a budget proposal covering this will be put through in the regular manner.

C. L. BATES
Plant Manager
