S. E. Wooley

Zelienople Brick

Dr. K. W. Smith at headquarters has requested that we determine the percentage of free silica in various JM products and the list includes all of the Zelienople brick, JM-16, JM-20, JM-23, JM-26, JM-28 and JM-30.

We can set up a problem to make this study which will be don by D. Bailey possibly with the assistance of Dr. H. Insley, our consultant.

Will you please provide reliable and representative samples of each of these brick which may be turned directly over to Mr. Bailey for his attention. The size of the samples need not be large but it is strictly essential that they be known to be representative.
