Hospital.

March 31, 1947.

Mr. Ivan Sabourin, K.C.
St. Johns,
Que.

Dear Ivan:

Re: Monthly Reports.

This suggestion definitely is worth while. At first I was not certain just what you had in mind, but I contacted Dr. Cartier and he said that it was a report on tuberculosis found in the clinic. We discussed the matter and expect to meet in the very near future to consolidate our plans.

We shall use the same formula, probably the one used by Dr. Cartier at present for it is the universal one in the States.

We plan to meet at least once each month, alternating here and in Thetford, to discuss problems and review films. Thus there will be more uniformity of procedure and results in the two clinics.

Sincerely,

K. W. Smith, M.D.

KWSmil
