Pulmonary Function Studies

I was pleased to note that it is possible for you now to resume the pulmonary function studies of our employees with Dr. Motley. In previous correspondence I brought up the question about reports of the results of these studies. I have just written to Dr. Motley suggesting that he should not report to anyone until he had an opportunity to discuss this further with us. As you know, Hugh Jackson will be on the coast early in October. I believe he plans to discuss reporting with you and, afterwards, when he is in Los Angeles with Dr. Motley.

I wonder if the selection of subjects can be made so that there will be no disturbing influence on your forthcoming contract negotiations.

Kenneth W. Smith, M.D.
