Subject: MEDICAL RECORD ABSTRACTION AT ASBESTOS-USING LOCATIONS IN NORTH AMERICA

A retrospective-prospective morbidity study involving all asbestos-using locations is currently underway. The study, which was requested and approved by John McKinney will be completed in 1980.

Beginning in September of this year, a team of Accredited Medical Record Technologists, under the direction of Dr. Gerald Chase, J-M's Biostatistician/Epidemiologist, will begin the abstraction of medical records. During the coming weeks Dr. Chase will be contacting personnel at the locations to discuss specifics of the study and work out the logistics. Please be assured that it is axiomatic that there will be minimal disruption of primary occupational medical activity as a result of the study.

If you have any questions regarding the study, please contact Dr. Chase at WHQ on extension 3132. If your questions require the consideration of J-M's Medical Director, Dr. William Paul, or myself, Dr. Chase will bring it to our attention. I appreciate your cooperation in this most important effort.
