Dr. and Mrs. A. J. Vorwald
The Saranac Laboratory
Saranac Lake, New York

Dear Dr. and Mrs. Vorwald:

I arrived home safely, following my trip to Saranac, and found everything in good order with the exception of an unusual amount of work which had been deferred to greet me on my return.

I feel that my trip there was a very profitable one; enlightening from the viewpoint of learning of the nature, character and extent of the valuable research work you are doing there, and profitable from the viewpoint of discussion of our problems, viewing our chest films, and application of the information obtained to my work here.

I am totally lacking in words to express to you my appreciation for the many and unusual kindnesses and courtesies, both professional and social, extended to me during my visit there. I can only hope that Edith and I may have the opportunity of better expression by having you both visit us here in Waukegan. Dr. Vorwald may find it of interest to see our hospitals, particularly our tuberculosis sanitarium, and the Johns-Manville Plant, that he may see the manufacturer of asbestos and silicosis as produced in Waukegan. I do hope that we may have the pleasure of having you both here but we are dependent upon your letting us know when it will be convenient for you to make the trip or stop enroute elsewhere.

I am sending, under separate cover, to Mrs. Vorwald a little dish which Edith picked out for me as just a small material token of my appreciation of her kindness and the inconvenience I may have cause her, particularly in view of it being so soon after her illness. I think it is called a cheese dish for cheese in the center and crackers on the side, or any such purpose desired.

With very best personal regards and sincerely hoping to see you both in Waukegan during the coming spring or summer, I am

Very sincerely,

Samuel L. Keller
