VIA AIR MAIL

Mr. W. J. Hennessy
San Francisco Office

NORTH AMERICAN AVIATION
Stonefelt As a Health Hazard

Referring to draft of letter concerning the effects of handling Stonefelt as a health hazard as attached to my letter to you of August 29th, wired you today as follows:

HOLD UP WRITING NORTH AMARICAN LETTER REGARDING STONEFELT. SENDING REVISION AIR MAIL

Will you please make the following two revisions in this draft. Paragraph 2, second sentence, eliminate words "this material and", making the sentence reads

"We have had more than thirty years' experience with materials of substantially similar composition."

Secondly, in paragraph four, eliminate the last sentence and substitute the following sentence:

"The material used in making these experiments was mineral wool of our manufacture which is made from the same type of raw materials that are used in the manufacture of Stonefelt".

With the above revisions, this will be satisfactory to use. However if you have already written the North American Aviation Company, it will not be necessary to correct your letter.

For any future inquiries pertaining to this subject, it will be necessary to refer each individual inquiry to us at General Headquarters for individual handling. We trust that you appreciate the reasons for this.

EF:MM

Elliot Fairback
