Re: Dominic Bertogliat
PH8-415

Dear Dr. Vorwald:

I was out of town for several days so I have just had opportunity to read your letter of July 20. We appreciate your efforts in obtaining the tissue specimens and are, as you can understand, disturbed by the findings.

Because of the personal relationships involved in handling this case at the Waukegan plant, it would be desirable for us if your report to Dr. Berdez could be delayed for a time. I could advise you when the appropriate steps have been taken at Waukegan. I do not believe the delay would be more than two or three weeks.

We appreciate your interest and opinion.

Very truly yours,

H. M. Jackson
Safety Engineer
