WHD

General Headquarters
March 20, 1968

K. V. Lindell - Jeffrey Mine

Proposed Label for Asbestos
C. L. Sheckler's Letter of 3/15

I concur with the suggested format and wording of the proposed caution label.

It conforms to the Manufacturing Chemists' Association recommended practice, which is generally accepted by U. S. industry and state and federal governmental agencies.

The lines of reasoning presented by Mr. Sheckler for the terminology involved are excellent, and I would anticipate that the wording is both precise and broad enough to satisfy the requirements for international usage.

H. M. Jackson
