Dr. K. W. Smith

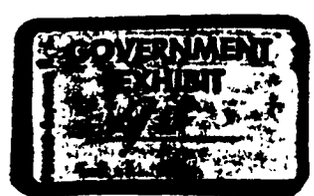

Industrial Insulations Division
Labeling of Asbestos Products

As a result of many discussions we are about to begin labeling Cements, Millboard, molded insulations and boards produced by I.I.D.

Before deciding on the wording of the label and the method in which it is to be applied, I would like to review and approve the proposal. This also will give an opportunity to advise other company responsibilities that we are about to commence this program.
