Lompoc Plant
February 23, 1950

J. P. Woodard - General Headquarters

Industrial Hygiene, Lompoc

In reply to your letter of February 20, 1950, on the above subject, I discussed the matter of the special list with Dr. Anderson this morning. He informs me that the list will be prepared in its final form within the next 30 days. As soon as it is completed you may expect to receive a copy of it.

While it is true that I kept notes of our meeting at the hospital, I hesitated to write them up, inasmuch as I do not feel I am capable of putting into words Dr. Anderson's talk. The only item that required action was the decision to take X-rays of individuals every three months in areas where we believe there might be a problem.
