Talk to Dr. Jones
Send with proposal. FILE COPY

October 25, 1950

Dr. A. J. Lanza
Department of Industrial Medicine
New York University-Bellevue Medical Center
477 First Avenue
New York 16, New York

Dear Tony:

Here is a copy of Dr. Vorwald's Proposal for further diatomaceous earth research with chemical product, and a copy of my letter to him of today.

I should appreciate it very much if you would find it possible to study this Proposal and then stop by for about half an hour to discuss it with us some time within the next few days.

Judging from Edwards Report Dr. J, dated October 12, on the diatomaceous earth study, copy of which is [illegible] to you, we must necessarily feel quite concerned about [illegible] of our operations at Lompoc. For that reason alone, it seems to be important that we promptly take any counter measures we can and the chemical therapy seems best at the moment.

As discussed with you here, perhaps we should go ahead with the chemical therapy even before we get the results of further diatomaceous research. That, of course, is a matter that is under consideration, and which we can again review with you when we meet with you.

Yours sincerely,

J. P. Woolard

Enclosure
