OCCUPATIONAL DISEASES
BLOWER ACT
Your letter June 27th

The Illinois State Legislature adjourned Sine Die on Sunday morning June 30th. You doubtless will be glad to learn that no legislation was passed covering either the proposed Blower Act or Occupational Disease Act. Neither of these Acts in the forms submitted by the Illinois Manufacturers Association were agreeable to labor. New bills were introduced and as a result of the excellent work done by the representatives of the Illinois Manufacturers Association these bills were killed. Therefore we find ourselves today in exactly the same position as previous to the proposed legislation.

I discussed this matter with Mr. Clarke this morning and he stated that we were mighty fortunate in not having the amended bills put through, as they would have put most of the industries in Illinois out of business.

Now that we have a definite decision, what shall we do in reference to Budget Proposals No.112-2 covering dust collecting equipment for Cement Department, No.112-3 covering dust collecting equipment for the Transite Pipe Department, No.112-4 covering dust collecting equipment for Transite Pipe Fibre Department and No.112-5 covering dust collecting equipment for the Magnesia Building? All four of these Budget Proposals have been approved and appropriation issued.

J. P. KOTTCAMP,
Waukegan Factory.
