C. M. McGaw - Asbestos

Industrial Hygiene - Asbestos

You probably will have been advised by the time this reaches you of the approval granted yesterday to extend the dust sled and Cottrell system at a cost of more than $5 million.

I was able to make good use of Dr. Smith's study on the 703 men, which he prepared some time in the early part of this year.

I am glad that this approval was granted and hope that this will make a real improvement in your working condition situation, both within and without the plant.

J. P. Woodard
