FIBRE SHIPMENTS - IMPROVED PACKAGING

Effective immediately, the A.F.D. is taking positive steps to improve the condition on arrival of shipments packaged in paper bags. The basis weight of the paper in the bag will be increased by at least 50%. We are converting to 3-ply bags in some grades immediately and in all others just as soon as our inventories of 2-ply bags are depleted.

In order that we may evaluate the improvement in "condition-on-arrival" of our shipments from Jeffrey, please ensure that your plants continue to return the self-addressed report cards which we make every endeavour to include in every car.

J.R.M. Hutcheson
