CAUTION LABELS - ETERNIT SHIPMENTS

I am enclosing copy of a letter from B. Snyder of the International Division regarding caution labels on Eternit shipments.

I believe the letter is self explanatory and you realize the importance of the situation. If possible please advise how these labelled boxes were shipped to Eternit, and what future precautions you intend to take. Note also that the South African shipment which I believe is scheduled for late January should not have these labels.

R.E. Sampson

By now you should have Fletcher's report. Only 100% way is to ship 2 M in paper. RES
