Herbert Miller

The information forwarded with your letter of October 14 and the X-rays have been reviewed. Dr. Smith concurs with Dr. DuBow's opinion that there is no evidence of occupational pulmonary disease, but rather the data indicates ordinary tracheobronchitis.

I would suggest that you advise Mr. Hall, in accordance with a request in his letter of August 5, 1952 to you, that in our opinion there is no evidence of occupational disease and nothing to substantiate the claim that Mr. Miller has indicated will be filed.

In your letter of August 15 you mentioned a communication from Dr. Emmett Kelly of Montsanto Chemical Co. concerning their experience with Sant-o-cel. I requested a copy of this communication in my letter of August 27 but to date have not received it.

You indicated that Traveler's Insurance Company was investigating the claim for health and accident insurance benefits. Kindly advise the status of this aspect of the case.

My Letter December 23rd

Will you advise whether, as recommended in my letter, Mr. Hall has been advised of our stand in this matter?

As also requested, will you forward a copy of the communication from Dr. Emmett Kelly of Montsanto Chemical Company pertaining to Sant-o-cel, referred to in your letter of August 15th?

Further, what is the status of the Travelers Insurance Company's investigation of the claim for health and accident insurance benefits?

H. M. Jackson
