Rules & Regulations Relating to Labeling in the Use, Handling and Storage of substances Harmful to the Health & Safety of Employees

We have examined the regulation of the State of Illinois with reference to labeling asbestos fibre and it is our opinion that in order to comply with the Illinois law, bags containing asbestos fibre should be labeled in the following manner:

CAUTION - ASBESTOS FIBRE

Inhalation of asbestos fibre over long periods may be harmful. The material should be so used as not to create dust or, if this is not possible, employees should be equipped with adequate protective devices.

We have discussed this matter with Dr. Lanza and Mr. Vandiver Brown and it is the opinion of Dr. Lanza that as far as the medical angle is concerned the label is sufficient and it is our opinion that the label complies with the legal requirements of the Illinois statute and the regulations issued thereunder.
