Asbestos, Que.,
February 16, 1950.

R. S. Gardner - Toronto Office

Dear R.S.G.:-

Thank you very much for the enclosed letters, I have made a copy of them for my files. I really would appreciate it if you could obtain a copy of the newspaper clippings mentioned in the letter to Dr. Fisher, for I would like to following this subject more thoroughly. Cortain places and times are known to cause lung cancer, but to date I know of no definite knowledge from this country as to our climatic conditions. The chief causes of lung cancer are dust and contain and tar products.

Next week I expect to go to Ottawa into to discuss cancer of the lung among other things and shall follow this up and report to you any significant findings.

Did you get the proof films? They were sent some after you left Asbestos.

Kenneth W. Smith, M.D.
