ENVIRONMENTAL CONTROL DEPARTMENT
MANVILLE
JUNE 17, 1974

TO: G L SWALLOW.

THE INDUSTRIAL HYGIENE SURVEY OF THE NASHUA FACILITIES WAS CONDUCTED BY L J GRECO AND D SAUER ON MAY 6 TO 14, 1974. DURING THE SEVEN DAYS A FULL SURVEY WAS COMPLETED.

THROUGH PERSONAL OBSERVATIONS OF THE PLANT, WE FOUND THE HOUSEKEEPING TO BE IN FAIR CONDITION. IN RESPIRATOR REQUIRED AREAS MOST EMPLOYEES USE MSA DUSTFOE 66, OTHERS USED MSA DUSTFOE 77 WELSH MODEL 7165 AND AO-UM 2121 DURING THE SURVEY WE HAD THREE PERSONNEL WHO WOULD NOT WEAR A SAMPLER. ALL THREE WORKED ON THE SANDING LINE IN BLDG 5 IT JUST SO HAPPENS THAT TWO OF THEM ARE SIC? STEWARTS. THIS INCIDENT HAS OCCURED FOR THE LAST THREE YEARS. EXCEPT FOR THE INCIDENT MENTIONED ABOVE, THE COOPERATION WAS GOOD

L J GRECO
