January 11, 1944.

. Leroy U. Gardner,
ranac Laboratory,
ranac Lake, N. Y.

ar Dr. Gardner:

I am not clear from yours of January 8th
ether you desire to review some of the X-rays of our
ployees or whether your request is limited to a review
the Manheim cases. Manheim, of course, is a factory
cation of the Raybestos-Manhattan Company, and perhaps
u desired that I make the necessary arrangements through
. Simpson. On the other hand, perhaps you intended your
ference to be to films taken at our Manville plant.

I agree with you that it would be desirable to
clude in your paper some specimen pictures to demonstrate
e X-ray appearance of asbestosis.

Sincerely yours,

Vandiver Brown,
Secretary.
