Present Bill Lohuis
Ernest Randolph
Mrs. Hess
Cliff Scheckler

Discussion with Cliff Scheckler
12 Noon - 2 pm Sept. 16, 1969

1. We have had a dirty house and now we have to pay for it. You are paying for it? (Not here - was in private discussion - with Scheckler)

2. Respirators are not as efficient as We thought they were. We are have new dust measurement with fiber counts - must be under 12/cc.

3. More clean up needed but not sure whether to spend 1/4 million or close down Rigid Shingle.

4. We are cleaning up now - but we do not have enough engineers and can not find enough good engineers to do it all at once so we are starting at Mansville N.Y..

5. Scheckler agrees that special pneumoconiosis people can be moved.

6. Would not agree yet with Regular rotation.

7. Said have looked for years for new Medical director and found none and have decided to operate with a Lay medical director. George W. Wright is a consultant to Chairman of Board - Would continue this way until they found one.

KW00202

JMC has not been able replacement for Ken Smith.

8. May get consultation locally.

9. New possible relationship between Crysidolyte and Bronchogenic CA. Mesothelioma not related to the amount of pneumoconiosis.

10. Men to be tested with 45 min sample backet dust counters worn on coat.

11. Tacidly agrees with my recommendation to education of men about pneumoconiosis.

12. Said previously were not getting information to the people level - Sometimes not to the plant Manager Level. New explanation will be given to the men when they are given dust counters.

Discussion with
Cliff Schleckler
12 Noon – 2 pm Sept 16 1969

Present
Emmet Randolph
Mrs Hess
Cliff Schleckler

1. We have had a dirty house and now we have to pay for it
x You are paying for it!

Note – here was in private discussion w Schleckler

2. Respirators are not as efficient as we thought they were
We ord have need dust measurement with fiber counts – must be under 12/cc

3. More clean up needed but not sure whether to spend ¼-Million – or close down Rigid Shingle

4. We are cleaning up now – but we do not have enough engineers and can not find enough good engineers to do it all at once So are starting at Mansfield W. V.

5. Schleckler Agrees that Special pneumoconiosis people can be moved
