O.B. Westmont - Lompoc

Carl A. Whipple - Deceased.

Thank you for your letter of December 31 on the above and I feel it is entirely proper to have taken the steps which were made in this case and in any case which might come up that will give further information on this whole subject. The quicker we get the information on every phase of this problem, the better off we will be.

Certainly, with the steps we have taken to minimize our nuisances to date and with the steps that are in process of completion, you will have gone a long way forward in correcting our conditions.

Definitely, we do not wish to have any action taken or any views spread which would create an alarmist attitude or condition. We will leave such items to your discretion and to Dr. Anderson to see that they are handled correctly. If, however, there is any conflict of opinion between the medical people and yourself, or if they desire us to take any radical steps, please immediately advise us.

Arthur Elsenbast.
