DEC 3 - 1968

Cliff Sheckler:

Re: George Ortega
Workmens Comp Case.

As I discussed with you at one of your recent visits, Hensley & Hensley had made a motion to Quash a Subpoena Duces Tecum on 7-10-68, for Dust measurements.

Copy attached - Originally sent to New York and returned by W. Lanigan and referred to Hensley.

The CASE was taken "off Calendar" so the motion to "Quash" was not heard.

The Hearing is rescheduled for December and I am Sending all Ind. Hygiene records to you, as per our Conversation. No records will not be available at the Long Beach Plant.

Alan Harris and I discussed this and were wondering if advisable for you to Send a note requesting the books to be Sent to you for review. Post dated. If I am Subpoened I Suppose I may be required to State that the books are Sometimes kept in the Plant but are your responsibilty and in your Custody.

asbestosclaims.law/library/11784/1

I am also Sending the EID Plant records as a precaution.

Please advise.

Paul D. Burnum - Long Beach

Copies Attached - Notice of Process.
- Hearing Motion to Quash.
