Re: George V. Ortega vs Johns-Manville Products Corporation
(Margaret F. Ortega)

Gentlemen:

On July 8, 1968 I sent Mr. Sisk some information relative to asbestosis, including Mr. Harry Nelson's report on the Junior Nelson case.

In this case, relative to dust studies, we do not choose to present dust counts. Obviously we do not want any information as a matter of public record. (Note Jack Sisk motion to quash subpoena duces tecum dated April 12, 1968.)

We can have a representative of our personnel department present to review the employment record and bring the medical and personnel folder. I could not testify to any conditions surrounding the work area as I did not work here during Mr. Ortega's employment.

Jack Sisk visited the Plant and observed the area of Mr. Ortega's work and you are invited to also inspect the area and if photographs are needed we will get them. We could also review the case at the time of your Plant visit.

Attached is notice of hearing for December 16 and December 17, 1968.

Please advise.

Very truly yours,

Paul D. Burnum
