Chicago 10, Illinois
September 27, 1943

Dr. Leroy U. Gardner, Director
Saranac Laboratory
Box 551
Saranac Lake, New York

Dear Doctor Gardner:

The application of the Saranac Laboratory for $10,000 in aid of a study of the relation of asbestosis to pulmonary carcinoma will be considered by the National Advisory Cancer Council at its next meeting. Undoubtedly members of the Council will ask for some general information about the nature and frequency of asbestosis. Will you be good enough to help me out with a brief statement of the main factors in regard to asbestosis?

With thanks in advance for your trouble,

Yours sincerely,

Ludvig Hektoen
