Mr. T. H. Fletcher – Los Angeles Factory
Mr. W. S. Kelley – Redwood City Factory

DUST COLLECTING EQUIPMENT
My letter September 9, 1931

On September 9th, 1931, I sent a general letter to all Factory Managers, under the above subject. I desire to hear from you, by return mail, as to just what has been done by you in the installment of equipment for the elimination of dust in any departments of your plant and the amount of money spent in this connection since September 9th, 1931.

I also desire to know just what moneys you have appropriated or are asking for at this time, or may be spending, for carrying on this work. Just how much work have you done, if any, on the physical examination of your employees? What instructions, if any, have been issued by you, as Plant Manager, regarding the use of respirators, etc.?

Please let me have a reply by return mail.

S. A. WILLIAMS,
Vice President
