PERSONAL & CONFIDENTIAL

Mr. A. T. Fisher - Manville Factory
Mr. J. P. Kettenamp - Waukegan Factory
Mr. J. C. [illegible] - Hasbrouck Factory
Mr. C. H. Schroeder - Canadian Johns-Manville Co. Ltd, Asbestos, Que.
Mr. J. E. Seigert - Alamomalrin Factory
Mr. L. J. Spangler - Cincinnati Factory
Mr. H. B. Murphy - Crushin Factory
Mr. A. Cromwell - Lompoc Factory
Mr. C. L. Bates - Pittsburg, Cal. Factory
Mr. T. H. Fletcher - Hoover-Henry Factory
Mr. W. B. Kelley - Redwood City Factory.

DUST COLLECTING EQUIPMENT

Recently at Manville, N. J., after considerable experimental work, we completed the best type of dust collecting equipment for the handling of waste and dust in Pipe Covering and Textile Departments. Plans are under way at the present time for further improving the equipment for the collection of dust in the Shingle Departments. The equipment which is being used at Manville was finally decided upon after considerable expenditure of money in experimenting and working in conjunction with the B. F. Sturtevant Company, who put in the Manville installation.

It is our intention, and has already been approved by the Officers Board, that each factory and mine location contact with Mr. D. C. Newton, at Manville, N. J., for engineering details of their particular dust problem, particularly Textiles, Pipe Covering and Shingles. After you have received drawings from Mr. Newton and applied them to your own particular problem, will you please write to Mr. Newton, with blue prints, data, etc., in order that he may approve of this system, and then make up a Budget Proposal for going ahead with this work at the earliest possible moment.

At the present time Manville Factory is probably further ahead on the matter of dust collecting than any of the other plants, but, as explained above, this has been due to the experimental and test work done during the last year, and now we wish to capitalize on it in all plants.

S. A. WILLIAMS,
Vice President

CC: Mr. D. C. Newton,
Manville Factory.
