Mr. E. H. Jeffords, Gen. Mgr.,
General Asbestos & Rubber Division,
North Charleston, S. C.

My dear "Jeff":

At meeting last week in Manheim, we decided to Xray all new men we hire at Manheim and Passaic. We have not definitely decided whether to make this a permanent rule or not, but at least are going to try it out for a few months to see what it shows.

In reference to Xraying and examining all the men now employed, it was decided to do this gradually, and we think by proper education and judicious dissemination of information by word of mouth, we can create the desire on the part of the men now employed, to be physically examined, without any cost to them. This has been done in several places where men have asked for the physical examinations and, of course, if they do that, we can very readily take an Xray in order to make it complete.

The Charleston Division is in a little different position from the other Divisions, on account of the number of suits we have had filed against us, and it is a case where we will be sued if we don't examine them, and may be sued if we do, so we shall go ahead and examine them, but will use a little diplomacy in doing it, and will not attempt to examine them in mass formation. It is going to be a case where you will have to use a little personal judgment.

You have a number of different departments in the factory, but will have to have them all medically examined, if they have not already been, and will have them Xrayed with the possible exemption of the Packing Department and Shipping Department, but all departments should be examined for instance, in the Shipping Department, you may

find a number of men that have hernia, and if so, will have to transfer them to lighter work. I think the whole thing can be worked out satisfactorily, if we use a little judgment.

In reference to the cost of Xrays, with the necessary plates, it will run somewhere around $6.00 to $10.00, according to estimates we have received.

When you get your plans laid, I wish to go over them with you, and whether I shall have you come to Bridgeport, or whether I shall go to Charleston, I will decide when I hear from you as to what plans you have outlined.

Very truly yours,

SS-G.

CH 0029
