R. B. Davies - Toronto Plant

WEARING OF RESPIRATORS
Receiving.

It has been called to my attention that the employees receiving Silex are not wearing goggles while handling this material.

It is most important that we insist that all employees handling Silica Flour be provided with respirators and we must insist that they wear them at all times while either handling or in the vicinity of Silica dust.

If there are any violations of these instructions, will you please make up "violation slips" and discharge any personnel that fail to comply with Company instructions.

This is a very serious matter and should be given prompt and continuous attention.

T. H. EATON.
