Federal Labor Union No. 21626

American Federation of Labor and
Congress of Industrial Organizations

221 NORTH MAIN STREET

RAndolph 5-1874

MANVILLE, NEW JERSEY

January 15, 1957

Mr. M. F. Maylor
Manager of Industrial Relations
Johns-Manville Corporation
Manville, New Jersey

Dear Mr. Maylor:

The following is a list of complaints pertaining to the dust condition in "A" Building.

1. The dust in Dept. 115 around the new L.Frame, also around the Pot Twisters

2. The Pickerhouse is bad, even with the new machines installed.

3. The Card Room is still very bad, when certain dust houses are being cleaned.

4. We believe that where the humidifiers were installed, it did not help the dust situation.

5. In general the whole Building is bad. I believe that other Companies have better dust systems, to eliminate dust than we have. Also the dust floating outside of "A" Building is bad. The dust conditions in "A" Building are getting worse than they were back 4 or 5 years ago. It seems that when a survey is made by Industrial Engineering, or others, that we receive the same report, "Not To Bad"., Well the people in "A" Building say different, they know that they are eating more dust today than before. Also doctors are telling them that they should get out of this dust.

I hope that we will get some action on this matter soon.
Thank You.

Very truly yours,

EDWARD MACKO
President
