Re: Pre-Employment X-rays - Jarratt

As I surmised, Metropolitan Life is not very enthusiastic about continuing to examine and interpret the pre-employment X-rays made at Jarratt. I discussed this with Dr. Lanza in Pittsburgh last Tuesday and he expressed this opinion, although he stated they would still be glad to assist us in the interpretation of cases where claims for dust disease disability have been filed and also in cases where we are in doubt as to the proper interpretation of films. In the case of Jarratt, where little or no harmful dust is created, it is doubtful we will ever have occasion to call upon Metropolitan.

Dr. Lanza is going to provide me with the name of someone in Richmond, Va., with whom we can make arrangements similar to those at Marrero and other locations where we have no plant physician, and I will pass this information on to you as soon as I receive it.

Vandiver Brown.
