RE: ASBESTOS/HEALTH

As Jack Solon and I promised you when we were out in Denver the week before last, I am enclosing copies of several J-M Annual Reports and Quarterly Reports to Stockholders in which the company policy of seeking to determine the facts about possible risks from excessive exposure to asbestos and to eliminate such exposures is spelled out by our President.

You may want to add these to the copy, which you already have, of our basic position paper on asbestos/health.

Jack and I certainly enjoyed meeting you and having lunch together. We both very much appreciate your interest and follow through on the asbestos/health question, when it was brought to your attention by a Colorado state official.
