Subject **INDUSTRIAL MEDICINE AND SURGERY**

Written by H. E. Mock, Industrial Medicine and Surgery was published in 1920 by W. B. Saunders Company, Philadelphia, and was borrowed for review from the University of Northern Colorado. Although there is no mention of asbestos hazards, there is some discussion of dust in general. Also of interest is a chapter on industrial hygiene and production during World War I and a review of federal and state legislative bibliography on industrial medicine and surgery from 1916 to 1920.
