CAUTION LABELS
HIGH TEMPERATURE INSULATIONS

On September 2, I sent you a letter covering a proposed program for placing caution labels on all Industrial Insulations Division products containing Asbestos in the High Temperature line. I rescinded this letter in a wire dated September 10 because there were changes to be made in the program.

The Industrial Insulations Division still intends to place the precautionary information on all products containing asbestos in the High Temperature line. A program to carry this out has been reviewed with Dr. K.W. Smith, C.L. Scheckler and A. Peeler. It was the agreement that the following program would be carried out:

1. The following precautionary information will be placed on the outside containers on the products containing Asbestos in the High Temperature line:

CAUTION

THIS PRODUCT CONTAINS ASBESTOS FIBER.

INHALATION OF ASBESTOS IN EXCESSIVE QUANTITIES OVER LONG PERIODS OF TIME MAY BE HARMFUL.

IF DUST IS CREATED WHEN THIS PRODUCT IS HANDLED, AVOID BREATHING THE DUST.

IF ADEQUATE VENTILATION CONTROL IS NOT POSSIBLE, WEAR RESPIRATORS APPROVED BY THE U.S. BUREAU OF MINES FOR PNEUMOCONIOSIS PRODUCING DUSTS.

2. The program will be to place the above information in the printing layouts as part of the purchase specifications for the cartons or bags for each of the Industrial Insulations products listed below. These purchase specs.

Ctns. For Thermobestos P

CRMC-Motley1000-Subj-004425

Waukegan and Jeffery Mines are requested to send us samples of the containers listed above and advise if the purchase specs. are correct. Pittsburg Plant has already sent in sample bags.

Manville and Long Beach need not send in these containers as the program is already in effect for Thermobestos Block and Pipe Insulation. Purchase Specifications II-9205-6 and II-9205-15 covering Thermobestos Block and Pipe Insulation respectively were issued on 9/10/64 with the new precautionary information shown on the printing layouts.

you have any questions on the above, please advise.
