ASBESTOS-CONTAINING PRODUCTS NOT PRESENTLY CARRYING OSHA CAUTION LABEL

Crawfordsville Plant

Date: Feb. 4, 1975

PRODUCT	HOW PRODUCT WILL BE LABELED	DATE LABELING WILL COMMENCE
ilroad Brake Shoes	Not considered necessary	None planned

While this product contains asbestos fibers, when the product is shipped all such fibers all encapsulated by bonding agent. No further machining is involved prior to the product being installed on railroad cars for their end use.

ASBESTOS-CONTAINING PRODUCTS CARRYING OSHA CAUTION LABEL

R/M (Canada) Plant

Date: Feb. 4, 1975

PRODUCT	HOW LABELLED	DATE LABELLING COMMENCED
All products shipped to U.S. of A.	Asbestos warning label (either printed on cartons or master shippers or affixed by gummed label)	Jan. 1, 1975

DHM 21351

CRMC-Motley1000-Subj-002149

II

ASBESTOS-CONTAINING PRODUCTS NOT PRESENTLY CARRYING OSHA CAUTION LABEL

R/H (Canada) Plant

Date: Feb. 4, 1975

PRODUCT	HOW PRODUCT WILL BE LABELLED	DATE LABELLING WILL COMMENCE
Some Brake Blocks shipped in plain boxes carry imprinted caution label because same boxes are used to contain blocks going to Canadian customers and this use precludes a dual inventory of boxes.		Jan. 1, 1975

All Boxes will show Caution label eventually, as new boxes are ordered.

SUBJECT: Labeling of Asbestos-Containing Products

Please list all asbestos-containing products on one of the two attached forms.

I Products Presently Carrying the OSHA Caution Label

II Products Not Presently Carrying the Caution Label

Under the headings "How Labeled" or "How Product Will Be Labeled" specify how the label is applied, i.e., to each piece, to each set box, to each shipping carton or in some other manner.

For your guidance in determining which products should be labeled the present regulation is reproduced below.

"LABELING - Caution labels shall be affixed to all raw materials, mixtures, scrap, waste, debris, and other products containing asbestos fibers, or to their containers, except that no label is required where asbestos fibers have been modified by a bonding agent, coating, binder or other material so that during any reasonably foreseeable use, handling, storage, disposal, processing, or transportation, no airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section will be released."

Note particularly the regulation specifically refers to disposal. Thus the possibility of the release of airborne fibers during the entire life use and disposal of the product must be considered. For example, the asbestos in gasket material may be completely encapsulated when initially installed. During use, however, the material may be subjected to heat, pressure, vibration or other factors which could cause a breakdown of the material and release of asbestos fibers during removal or replacement operations.

Because of the possibility of extreme penalties for failure to provide notice of a potential health hazard, prudence dictates labeling wherever the chance of excessive fiber release exists.

Completed forms should be returned to this office by February 3, 1975.
