For the past two years and particularly during the last 18 months, I have attempted to communicate to R/M management the seriousness of the asbestos health issue as it relates to R/M. I thought the meeting in June 1973 at which mortality and morbidity data was reviewed in detail would be more than sufficient to shock people into action. Even then it was not happened. Little action - very poor communication. See next pg

Insert 1 (illegible)

R/M is in a unique and vulnerable position - not typical of asbestos industry as a whole - H K Porter probably out most vulnerable. Other more expensive operations have been eliminated. Extrusion insulation must shut down. Tyler, Cayce insulation plant eliminated, Vicksburg operations cleaned up & shut down.

Textiles

- R/M health record indefensible - must face it and act getting better
- [illegible]

Why cooperate with scientists?

- To assist in the determination of safe levels of exposure - Note Keene paper
- We have valuable information going back to 1932
- have been told by Gibson, Mancuso, Vorhaus (image not good if we fail to respond) - Dr Hadley Dr Mann
- obligation to employees
- legal implications of working with [illegible]
- Gardner recommends Gubin - Stay away from Mancuso - private paid retainer
