General Asbestos & Rubber Division
of Raybestos-Manhattan, Inc.
North Charleston, S. C.

April 18, 1938

Mr. Robert M. Brown, Chemical Engineer
Industrial Hygiene Division,
South Carolina Board of Health,
Columbia, S. C.

Dear Mr. Brown:-

I wish to acknowledge receipt of yours of the 15th inst. along with which you forwarded me a copy of the report of the dust study made in the Mule Spinning Department of our plant during the week of April 4, 1938. I have read this over carefully and am very much pleased to note the results of your study and also your comments as to the conclusions arrived at.

I wish to assure you that all of us at this plant greatly appreciate the assistance you are giving us in this study of dust problems and you can rest assured that we will very likely avail ourselves of your kind offer to make further checks whenever we feel that same are necessary.

Thanking you again for the work which you have done for us and with kindest regards to Dr. Wilson and yourself, I remain

Yours very truly,

GENERAL ASBESTOS & RUBBER DIVISION
of Raybestos-Manhattan, Inc.
