Bridgeport, Conn.

Subject: Dust Collection System

Dear Mr. Simpson:

So as to complete your files and that you will be posted in regard to the correspondence which we are having with the Arkwright Mutual Fire Insurance Co. as to the construction of the tunnel in connection with our dust collection system, we are enclosing herewith copy of letter which we have this day received from Mr. E. A. Barrier, Vice President and Engr. of the Arkwright Mutual Fire Insurance Co. You will note that Mr. Barrier advises that, after having examined the samples we sent to him, it will not be necessary to equip this tunnel with sprinklers nor will it be necessary to tin the floor of the tunnel.

We are very much pleased to receive this information from Mr. Barrier, for, of course, this will tend to lower the cost of the construction of this tunnel when same is erected.

We are also enclosing copy of our reply to Mr. Barrier.

As stated to you in a previous letter, we expect to complete the dust house during the present week and will then know sometime next week as to how satisfactorily the installation of the burlap bags on the top floor of Building #3 is working out. We feel satisfied that we are going to obtain good results.

The question of the erection of the tunnel will be discussed with you at some future date, for, as you know, we advised in previous letters that in case the tunnel is not erected we will have to make provision for renewing the present piping system as same is old and starting to wear out, and our idea is that the tunnel will be much cheaper to erect and also more economical to maintain.

Yours very truly,
GENERAL ASBESTOS & RUBBER DIVISION
