General Asbestos & Rubber Div. — UNITED STATES ASBESTOS DIVISION

Mr. Jeffords — Date 9/11/35

Dear Mr. Jeffords:

I know that during the past few years you people have done a lot of work on the hoods for ventilating cards and looms and I understand from several sources that you have done a fine job.

Can you send us blue prints of your latest hood designs for cards, cloth looms, and if you have them, for tape looms, twisters and spoolers? We would also be interested to receive figures as to the air volumes you are using per machine if you have them, and any other information in regard to this problem which you are able to give us.

We, ourselves, are planning to improve our dust collecting system and we believe that we will be able to save considerable time and expense if we can avail ourselves of your experience. Any data and information you can send us will be greatly appreciated.

Yours very truly,

DA — C. H. Burns
