NORTH CHARLESTON, S.C. January 8, 1937

Mr. S. Simpson, President
Raybestos-Manhattan, Inc.,
Bridgeport, Conn.

Dear Mr. Simpson:-

Referring to yours of the 5th inst. in which you issue instructions as to the routing of the Directors from New York to Passaic so as to arrive at Passaic in time to attend the meeting on January 20th, I wish to thank you for sending me this information and if I am able to attend this meeting I will look forward to seeing you all at the Weehawken Ferry at about 11:00 o'clock on January 20th. However, on account of conditions which have developed today, there is a possibility that it may be best that I be at the factory on the 20th.

The matter to which I am referring is this. You will recollect that some short while ago, we received a request from the South Carolina State Board of Health that they, in connection with the United States Public Health Department, be permitted to make a survey and study of dust conditions at this plant. This matter was taken up with you and you advised that we grant such permission. At that time, the understanding was that the survey would be made sometime during the coming spring. However, we are just in receipt of a letter from the South Carolina State Board of Health in which they advise that the United States Public Health representatives would like to be at this plant on January 19th. The writer feels that if these representatives are to be here to conduct this work that he should be here at the same time.

The writer will be very much disappointed if he is not able to attend this January meeting but he feels that he should be here, as stated above, when the survey is being made.

Yours very truly,
