THE SARANAC LABORATORY
FOR THE STUDY OF TUBERCULOSIS
OF THE EDWARD L. TRUDEAU FOUNDATION
SARANAC LAKE, N.Y.

June 26, 1941

Mr. S. Simpson
Asbestos-Manhattan, Inc.
Bridgeport, Conn.

Dear Mr. Simpson:

In connection with our study of asbestosis I have been interested in the effects of water and dilute alkalies upon this mineral. I seem to recall that in conversation with you a year or so ago you mentioned the fact that it had been a technical problem with which you had to deal. I was wondering if you could refer me to some person in the industry who might be in a position to tell me more about any studies that may have been made. I have found very little in the literature, but we do not have access to all of the journals which might deal with the subject.

Should you be planning to come up to Lake Placid this summer I trust we may have the opportunity to see you.
